AIIE TRANSACTIONS

Volume 5 1973

Subjects (coded) and titles

0100 Work measurement

0140 Basic motion standard data

"Development of standard data for stereoscopic microscope work;" Walton M. Hancock, Gary Langolf, Daniel O. Clark; June, page 113.

0155 Special labor category standard times

"Development of standard data for stereoscopic microscope work;" Walton M. Hancock, Gary Langolf, Daniel O. Clark; June, page 113.

0300 Facility planning

0315 Plant layout evaluation procedures

"Some properties of the squared Euclidean distance location problem;" J. W. Eyster, J. A. White; September, page 275.

0330 Materials handling analysis techniques

"An integrated materials management system: its design and formulation;" Ergin Uskup; June, page 142.

0355 Maintenance

"A Bayesian approach to the scheduling of preventive maintenance;" Prakash T. Sathe, Walton M. Hancock, June, page 172.

0360 Plant location

"A note to correct the procedure of Pritsker and Ghare for locating new facilities with respect to existing facilities;" A. Alan B. Pritsker; March, page 84.

"On solving multifacility location problems using a hyperboloid approximation;" James W. Eyster, John A. White, Walter W. Wierwille; March, page 1.

"On the direct search approach to the rectilinear facilities location problem;" M. R. Rao; September page 275.

"Some properties of the squared Euclidean distance location problem;" J. W. Eyster, J. A. White; September, page 275.

0365 Plant design and construction

"Optimal design for production facilities;" Colin L. Moodie, Randall P. Sadowski; September, page 230.

0370 Safety

"Safety investment allocation by dynamic programming;" David B. Brown; September, page 245.

0380 Transportation

"An accelerated sequential simplex search technique;" William E. Biles; June, page 127.

"Optimizing transportation problems with multiple objectives;" Sang M. Lee, Laurence J. Moore; December, page 333.

"Tighter bounds for stochastic transportation models;" Dan Wilson; June, page 180.

0400 Applied psychology

0455 Wage incentive plans

"New insights into the life cycle approach;" Peter S. Eisenhut; June, page 150.

0460 Selection of personnel

"The relationship between resource and utilization factors in an outpatient care system;" John K. Glenn, Stephen D. Roberts; March, page 24.

0500 Engineering economics

0505 Replacement theory

"The economic design of a dual purpose multicharacteristic quality control system;" Barry A. Latimer, G. Kemble Bennett, J. W. Schmidt; September, page 214.

"Simultaneous optimization of preventive maintenance and replacement policy for machines: a modern control theory approach;" Suresh P. Sethi; June, page 156.

"Capital budgeting and mixed zero-one integer programming, the quadratic case;" S. R. Radhakrishnan, V. E. Unger; December, page 366.

0510 Amortization theory

"The effects of technological change on the economic life of capital equipment;" Peter H. Grinyer; September, page 203.

0600 Organization planning

"Tighter bounds for stochastic transportation models;" Dan Wilson; June, page 180.

0400 Applied psychology

0455 Wage incentive plans

"New insights into the life cycle approach;" Peter S. Eisenhut; June, page 150.

0460 Selection of personnel

"The relationship between resource and utilization factors in an outpatient care system;" John K. Glenn, Stephen D. Roberts; March, page 24.

0500 Engineering economics

0505 Replacement theory

"The economic design of a dual purpose multicharacteristic quality control system;" Barry A. Latimer, G. Kemble Bennett, J. W. Schmidt; September, page 214.

"Simultaneous optimization of preventive maintenance and replacement policy for machines: a modern control theory approach;" Suresh P. Sethi; June, page 156.

"Capital budgeting and mixed zero-one integer programming, the quadratic case;" S. R. Radhakrishnan, V. E. Unger; December, page 366.

0510 Amortization theory

"The effects of technological change on the economic life of capital equipment;" Peter H. Grinyer; September, page 203.

0600 Organization planning

0610 Social scientist's aspects

"Social indicators and second-order consequences of health care delivery;" James G. Anderson; March, page 49.

0800 Production planning and control

"Note on a production inefficiency function;" Alan R. Washburn; September, page 281.

"Production flow line system design–a review;" G. M. Buxey, N. D. Slack; March, page 37.

"Project scheduling under resource constraints–historical review and categorization of procedures;" Edward W. Davis; December, page 297.

0805 Inventory Control

"An accelerated sequential simplex search technique;" William E. Biles; June, page 127.

0815 Scheduling

"An optimal procedure for allocating manpower with cyclic requirements;" Kenneth R. Baker, Thomas B. Crabill, Michael J. Magazine; June, page 119.

"A new approach to scheduling aggregate production and work force;" David A. Goodman; June, page 135.

"An integrated materials management system: its design and formulation;" Ergin Uskup; June, page 142.

"New insights into the life cycle approach;" Peter S. Eisenhut; June, page 150.

"A cost oriented approach to stochastic line balancing;" John F. Kottas, Hon-Shiang Lau; June, page 164.

"Evaluation of the shortest processing time scheduling rule with truncation process;" Muhittin Oral, J. L. Malouin; December, page 357.

"An N-product, multi-machine, lotsize scheduling model;" Arthur C. Ferreira, Thom J. Hodgson; September, page 237.

"The problems of tardiness and saturation in a multiclass queue with sequence dependent setups;" John D. Sawicki; September, page 250.

"Project scheduling under resource constraints–historical review and categorization of procedures;" Edward W. Davis; December, page 297.

"Solving sequencing problems through reordering operations;" Clifford C. Petersen; March, page 68.

"Heuristic scheduling for cyclic steam injection projects;" Guy L. Curry, Gordon Y. K. Chang, Jess W. Curry, Jr.; March, page 74.

0840 Analysis and measurement techniques for planning and control

"Target optimization control–automatic on-line control of a process to maximize profits;" Albert B. Bishop, John F. Donoghue; March, page 60.

0850 Stockkeeping and warehousing

"An investigation of branch and bound methods for solving the segregated storage problem;" David G. Dannenbring, Basheer M. Khumawala; September, page 265.

"An EOQ model for items with Weibull distribution deterioration;" Richard P. Covert, George C. Philip; December, page 323.

0855 Control models and simulation

"An EOQ model for items with Weibull distribution deterioration;" Richard P. Covert, George C. Philip; December, page 323.

"Simultaneous optimization of preventive maintenance and replacement policy for machines: a modern control theory approach;" Suresh P. Sethi; June, page 156.

"Evaluation of the shortest processing time scheduling rule with truncation process;" Muhittin Oral, J. L. Malouin; December, page 357.

"Heuristic scheduling for cyclic steam injection projects;" Guy L. Curry, Gordon Y. K. Chang, Jess W. Curry, Jr.; March, page 74.

0860 PERT, CPM, line balancing

"Production flow line system design–a review;" G. M. Buxey, N. D. Slack, Ray Wild; March, page 37.

"MALB–a heuristic technique for balancing large single-model assembly lines;" E. M. Dar-El (Mansoor); December, page 343.

"Balancing stochastic assembly lines;" N. Richard Reeve, Warren H. Thomas; September, page 223.

"Optimal design for production facilities;" Colin L. Moodie, Randall P. Sadowski, Thomas W. Hill, Jr.; September, page 230.

"An N-product, multi-machine, lotsize scheduling model;" Arthur C. Ferreira, Thom J. Hodgson; September, page 237.

"A new approach to scheduling aggregate production and work force;" David A. Goodman; June, page 135.

"A cost oriented approach to stochastic line balancing;" John F. Kottas, Hon-Shang Lau; June, page 164.

0900 Data processing systems design

0905 Digital computers

"An automated technique for patient health analysis;" Bernard J. Schroer; March, page 14.

1000 Applied mathematics

1005 Mathematical programming

"An algorithm for project cost-duration analysis problem with quadratic and convex cost functions;" Kailash C. Kapur; December, page 314.

"Surrogated linear programming;" John P. Dittmann, Glenn E. Staats; December, page 327.

"Optimizing transportation problems with multiple objectives;" Sang M. Lee; Laurence J. Moore; December, page 333.

"Linear programming approach for bounding moments of an unknown probability mass function;" Walter I. Richard; December, page 339.

"MALB–a heuristic technique for balancing large single-model assembly lines;" E. M. Dar-El (Mansoor); December, page 343.

"Capital budgeting and mixed zero-one integer programming, the quadratic case;" S. R. Radhakrishnan, V. E. Unger; December, page 366.

"Balancing stochastic assembly lines;" N. Richard Reeve, Warren H. Thomas; September, page 223.

"On the direct search approach to the rectilinear facilities location problem;" M. R. Rao; September, page 256.

"Geometric programming: a technical state-of-the-art survey;" Don T. Phillips, Charles S. Beightler; June, page 97.

"An optimal procedure for allocating manpower with cyclic requirements;" Kenneth R. Baker, Thomas B. Crabill; June, page 119.

"An accelerated sequential simplex search technique;" William E. Biles; June, page 127.

"An integrated materials management system: its design and formulation;" Ergin Uskup; June, page 142.

"Tighter bounds for stochastic transportation models;" Dan Wilson; June, page 180.

"On solving multifacility location problems using a hyperboloid approximation;" James W. Eyster, John A. White; March, page 1.

"Geometric programming with slack constraints and degrees of difficulty;" Don T. Phillips; March, page 7.

"A dynamic programming approach to a bidder selection problem;" Michael D. Devine, Hillel J. Kumin; March, page 33.

"Solving sequencing problems through reordering operations;" Clifford C. Petersen; March, page 68.

1010 Waiting line theory

"A variable time-increment method for queue simulation;" Charles E. Bradley; March, page 80.

"The problems of tardiness and saturation in a multiclass queue with sequence dependent setups;" John D. Sawicki; September, page 250.

1015 Simulation concepts

"An investigation of branch and bound methods for solving the segregated storage problem;" David G. Dannenbring, Basheer M. Khumawala; September, page 265.

"Optimal design for production facilities;" Colin L. Moodie, Randall P. Sadowski; September, page 230.

"The problems of tardiness and saturation in a multiclass queue with sequence dependent setups;" John D. Sawicki; September, page 250.

"A variable time-increment method for queue simulation;" Charles E. Bradley; March, page 80.

1030 Probability theory

"Safety investment allocation by dynamic programming;" David B. Brown; September, page 245.

1040 Acceptance sampling

"The Dodge CSP-1 continuous sampling plan under inspection error;" Kenneth E. Case, G. Kemble Bennet; September, page 193.

1045 Quality control techniques

"The economic design of a dual purpose multicharacteristic quality control system;" Barry A. Latimer, G. Kemble Bennett; September, page 214.

1055 Statistical theory

"New insights into the life cycle approach;" Peter S. Eisenhut; June, page 150.

"The effects of technological change on the economic life of capital equipment;" Peter H. Grinyer; September, page 203.

1070 Reliability

"A Bayesian approach to the scheduling of preventive maintenance;" Prakash T. Sathe, Walton M. Hancock; June, page 172.

"The Dodge CSP-1 continuous sampling plan under inspection error;" Kenneth E. Case, G. Kemble Bennett, J. W. Schmidt; September, page 193.

"The economic design of a dual purpose multicharacteristic quality control system;" Barry A. Latimer, G. Kemble Bennett, J. W. Schmidt; September, page 214.

1100 Costs and cost control

1110 Inspection

"The Dodge CSP-1 continuous sampling plan under inspection error;" Kenneth E. Case, G. Kemble Bennet; September, page 193.

"A Bayesian approach to the scheduling of preventive maintenance;" Prakash T. Sathe, Walton M. Hancock; June, page 172.

1115 Budgets

"Capital budgeting and mixed zero-one integer programming, the quadratic case;" S. R. Radhakrishnan, V. E. Unger; December, page 366.

1120 Control procedures

"A cost oriented approach to stochastic line balancing;" John F. Kottas, Hon-Shiang Lau; June, page 164.

"Target optimization control—automatic on-line control of a process to maximize profits;" Albert B. Bishop, John F. Donoghue; March, page 60.

1125 Purchasing

"A dynamic programming approach to a bidder selection problem;" Michael D. Devine, Hillel J. Kumin; March, page 33.

1300 Industrial engineering

"Project scheduling under resource constraints—historical review and categorization of procedures;" Edward W. Davis; December, page 297.

1305 Industrial engineering—general

"Production flow line system design—a review;" G. M. Buxey, N. D. Slack, Ray Wild; March, page 37.

1320 Industrial engineering in hospitals

"An automated technique for patient health analysis;" Bernard J. Schroer; March, page 14.

"The relationship between resource and utilization factors in an outpatient care system;" John K. Glenn, Stephen D. Roberts; March, page 24.

"Social indicators and second-order consequences of health care delivery;" James G. Anderson; March, page 49.
